

### **Guidelines for use of the Airphone Device at Cart Path Sliding Gate (4-5)**

An airphone device has been installed at the sliding gate from Hills 4-5 for the benefit of Palmetto Hall residents. **The Airphone allows security to remotely open the sliding gates. The intended use is to accommodate Palmetto Hall residents who want to enter the community from Fish Haul Road without using the keypad system during the day and until 1 hour past sunset. For security reasons, this device is not intended for late night use but can be opened in the event of an emergency.** Access to the cart path sliding gate at Hills course 4-5 is intended for golf carts, bicycles, and foot traffic only. Vehicular traffic is prohibited.

Residents will press the button displaying the key icon to request access. Security will respond to the tone and can view the resident on the video screen. Security will verify credentials of the resident by requesting the name, pin number and address. Once verified, the officer will grant access and will watch the area on camera until the gate is completely closed. Access will not be granted to **guests** requesting entrance to Palmetto Hall through the cart path sliding gate.
